## About White Cliff Nickel Limited

**White Cliff Nickel Limited** is an ASX listed Western Australian based exploration company with the following projects:

**White Cliff Nickel Project:** White Cliff Nickel's core project is the White Cliff nickel project which covers over 1,200 square kilometres in a prospective region situated 60 kilometres south-east of Laverton WA. This project has been joint ventured with a Korean consortium, comprising Daewoo International Corporation and the 100% government owned Korea Resources Corporation, for the Korean consortium to earn up to 50% of the project by the expenditure of up to \$5 million over the next 3 years.

**Lake Johnston Project:** This project covers approximately 1,400 square kilometres of exploration tenement applications in the Lake Johnson Greenstone Belt. This Greenstone Belt contains Norilsk's Emily Ann and Maggie Hayes nickel sulphide mines which combined have a total resource of approximately 140,000 tonnes of contained nickel. Much of the project area was previously held by LionOre and contain excellent prospectively for both komatiite associated nickel sulphides and amphibolite facies high-grade gold mineralisation. The area contains little outcrop, with the bedrock geology concealed by transported cover.

**Mount Remarkable Project:** The project located approximately 170 km N-NE of Kalgoorlie and about 25 km SE of Kookynie in the Northern Goldfields. Included in the project area are the historic mining centres of Mt Remarkable and Yerilla which consists of several old workings. Major gold mines in the surrounding area include Sons of Gwalia, Tarmoola, Carosue Dam, Granny Smith, Wallaby and Sunrise Dam

**Oakover River Iron-Manganese Project:** The Oakover River three exploration tenement applications are approximately 140 km east of the town of Newman, Western Australia and cover approximately 970 square kilometres. This area is considered to have potential iron and manganese mineralisation in an underexplored area.

The Information in this report that relates to exploration results, mineral resources or ore reserves is based on information compiled by Mr Todd Hibberd, who is a member of the Australian Institute of Mining and Metallurgy. Mr Hibberd is a full time employee of the company. Mr Hibberd has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2004 edition of the 'Australian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves (the JORC Code)'. Mr Hibberd consents to the inclusion of this information in the form and context in which it appears in this report.
