

3 February 2015

ASX Code: WCN

## EXTENSION OF PROSPECTUS CLOSING DATE

White Cliff Minerals Limited (“**White Cliff**” or the “**Company**”) has resolved to extend the closing date of the offers under its current prospectus, being the offer to raise up to \$917,000 by the issue of up to 114,618,158 shares at an issue price of \$0.008, (**Entitlement Offer**), and the offer of the shortfall to the Entitlement Offer (**Offers**).

As outlined in the prospectus parties associated with the Company’s largest shareholder and with White Cliff’s Chairman are partially underwriting the Entitlement Offer to the extent of \$600,000. Further Emerald Partners Pty Limited is assisting the Company with the Offers and the placement of any shortfall.

The new closing date for the Offers is 5.00pm WST on 20 February 2015. A revised timetable for the Offers is as follows:

Event	Date
Closing Date of Offers	Friday, 20 February 2015
New shares issued	Friday, 27 February 2015
Ordinary trading of new shares commences	Monday, 2 March 2015

The above dates are indicative only and may be subject to change. The Directors may vary these dates subject to any applicable requirements of the Corporations Act or the Listing Rules. The Directors may extend the Closing Date by giving at least three business days notice to ASX before the Closing Date.

## About White Cliff Minerals Limited

**White Cliff Minerals Limited** is a Western Australian based exploration company with the following main projects:

**Chanach Copper-Gold Project (88.7%):** The Project contains extensive porphyry related gold and copper mineralisation starting at the surface and extending over several kilometres. Drilling during 2014 has defined a major **gold discovery** with grades averaging **5 g/t** over true widths of 8 metres, and **20 g/t** over 2 metres. Drilling has also defined a significant **copper deposit** from surface containing 6.25 million cubic metres with copper grades ranging from 0.3% - 2.1% copper. Extensive mineralisation occurs around both deposits that demonstrates significant expansion potential. The project is located in the Kyrgyz Republic, 350km west-southwest of the capital city of Bishkek and covers 83 square kilometres. The Chanach project is located in the western part of the Tien Shan Belt, a highly mineralised zone that extending for over 2500 km, from western Uzbekistan, through Tajikistan, Kyrgyz Republic and southern Kazakhstan to western China.

**Merolia Project (100%):** The project consists of 771 square kilometres of the Merolia Greenstone belt and contains extensive ultramafic sequences including the Diorite Hill layered ultramafic complex, the Rotorua ultramafic complex, the Coglia ultramafic complex and a 51 kilometre long zone of extrusive ultramafic lava's. The Intrusive complexes are prospective for nickel-copper sulphide accumulations possibly with platinum group elements, and the extrusive ultramafic rocks are prospective for nickel sulphide and nickel-cobalt accumulations. The project also contains extensive basalt sequences that are prospective for gold mineralisation including the Ironstone prospect where historical drilling has identified 24m at 8.6g/t gold.

**Lake Johnston Project (100%):** The project covers over 127 square kilometres in the Lake Johnson Greenstone Belt, which contains the Emily Ann and Maggie Hayes nickel sulphide deposits. These mines have a total resource of approximately 140,000 tonnes of contained nickel. The project area has excellent prospectivity for both komatiite associated nickel sulphides and amphibolite facies high-grade gold mineralisation.

**Laverton Gold Project (100%):** The project consists of 136 square kilometres of tenement applications in the Laverton Greenstone belt. The core prospects are Kelly Well and Eight Mile Well located 20km southwest of Laverton in the core of the structurally complex Laverton Tectonic zone immediately north of the Granny Smith Gold Mine (3 MOz) and 7 kilometres north of the Wallaby Gold Mine (7MOz).

**Mount Remarkable Project (100%):** The project covers 185 square kilometres and is located approximately 170 km N-NE of Kalgoorlie and about 25 km SE of Kookynie in the Northern Goldfields. Included in the project area are the historic gold mining centres of Mt Remarkable and Yerilla which consists of several old workings. Major gold mines in the surrounding area include Sons of Gwalia, Tarmoola, Carosue Dam, Granny Smith, Wallaby and Sunrise Dam. The project includes several areas adjacent to and along strike from existing nickel deposits at Aubliss, Yerilla and Boyce Creek. These deposits form Heron Resources' Yerilla Nickel Project which contains 135 Mt @ 0.77% Nickel and 0.05% Cobalt.
