1. Investment Overview

1.1 Introduction

The Company has a number of significant exploration projects including an advanced gold-copper project in the Kyrgyz Republic, Central Asia, and a number of cobalt-nickel and gold projects in Western Australia.

The Board believes that its exploration portfolio is undervalued given the Company's current corporate structure and the Board is considering all options on how best to unlock/maximise the exploration value of these projects.

Although no definitive alternative strategy and/or transaction has been finalised, the Company is seeking to identify opportunities and is considering the merits of various sale, joint venture and spin-out listing pathways for one or more of the current exploration project portfolio.

1.2 Projects

(a) **The Coronation Dam Cobalt-Nickel project, Western Australia (100%)**

The Coronation dam project contains extensive regolith related cobalt and nickel mineralisation that occurs as a sub-horizontal layer up to 30 metres thick, up to 500 metres wide and extends along strike for up to 5 kilometres. Mineralisation outcrops at surface and drilling during 2018 has identified high grade cobalt mineralisation including:

- 24 metres at 0.19% cobalt and 1.2% nickel from 8 metres
- 8 metres at 0.16% cobalt and 1.0% nickel from surface
- 40 metres at 0.11% cobalt and 1.04% nickel from 16 metres
- 15 metres at 0.20% cobalt and 1.1% nickel from 29 metres
- 20 metres at 0.27% cobalt and 0.66% nickel from 28 metres including:
- 1 metre at 0.95% cobalt and 0.97% nickel from 31 metres and:
- 1 metre at 0.63% cobalt and 0.70% nickel from 35 metres

The Coronation Dam Cobalt Project is located 90km south of Glencore's Murrin-Murrin mining operation and 45km south of GME Resources' proposed Mt Kilkeny nickel-cobalt processing facility in Western Australia's north-eastern goldfields. The project is surrounded by world class mining infrastructure and multiple operating mines.

(b) **The Ghan Well Cobalt-Nickel project, Western Australia (100%)**

The Ghan Well project contains extensive cobalt and nickel mineralisation that occurs as a sub-horizontal layer up to 20 metres thick, up to 800 metres wide and up to 11 kilometres long. Cobalt mineralisation occurs as a shallow layer of cobalt enriched manganese oxides that form between the smectite clays and the overlying ferruginous clays. High grade cobalt mineralisation typically occurs between 10-30 metres depth and is associated with nickel mineralisation. Exploration results from the project include:

- 12m at 0.15% cobalt and 0.78% nickel;
- 11m at 0.15% cobalt and 0.99% nickel;
- 8m at 0.16% cobalt and 0.83% nickel;
- 6m at 0.21% cobalt and 0.78% nickel; and
- 4m at 0.27% cobalt and 0.75% nickel.

The Ghan Well cobalt and nickel project is located in the north-eastern goldfield of Western Australia approximately 70 kilometres from Laverton and 26 kilometres from Glencore's Murrin-Murrin cobalt and nickel processing plant.

(c) **The Cogleia Well Cobalt Nickel Project, Western Australia (100%)**

The Cogleia well project contains extensive cobalt and nickel mineralisation that occurs within the regolith profile up to 30 metres thick, up to 1000 metres wide and 11.5 kilometres long. Drilling during 2018 has identified substantial cobalt and nickel mineralisation including:

- 17 metres at 0.11% cobalt and 1.01% nickel from 78 metres including;
 - 6 metres at 0.22% cobalt 1.6% nickel
 - Single metre cobalt grades of 0.49% and 0.29%
- 20 metres at 0.1% cobalt and 0.7% nickel from 32 metres including
 - 11 metres at 0.13% cobalt and 0.63% nickel from 41 metres
- 16 metres at 0.12% cobalt and 0.52% nickel from 40 metres including
 - 12 metres at 0.13% cobalt and 0.55% nickel
- 2 metres at 0.38% cobalt and 1.05% nickel from 65 metres

In addition, drilling has identified high grade nickel mineralisation with associated copper anomalism thought to be related to the deposition of nickel sulphides. Results include:

- 4 metres at 0.11% cobalt, 3.20% nickel and 314ppm copper from 43 metres including;
 - 3 metres at 0.12% cobalt, 3.85% nickel and 346ppm copper
- 12 metres at 2.2% nickel and 0.06% cobalt from 80 metres, including 4 metres at 3% nickel and 0.06% cobalt.

Highly anomalous copper assays suggestive of sulphide mineralisation including;

- 23 metres at 1,024ppm (0.1%) copper from 22 metres
- 33 metres at 527ppm copper from 18 metres

The Cogleia Well project is located 75km south-east of Laverton in a region of extensive mining infrastructure and nickel-cobalt processing facilities in the goldfields of Western Australia.

(d) **The Aucu Gold and Copper project, Kyrgyz Republic (90%)**

The Aucu Gold Deposit contains extensive porphyry related gold and copper mineralisation that occur as multiple mineralised zones that outcrop at surface and extend up to four kilometres along strike. Gold mineralisation has also been defined in outcrop over 600 metres of vertical elevation.

Drilling during 2017 increased the existing gold inferred mineral resource by 60% to:

- 2.95Mt at 5.1 g/t containing **484,000 ounces of gold**; and
- 700,000 tonnes at 0.51% copper containing 4,000 tonnes of copper

Extensive mineralisation occurs around both deposits demonstrating significant expansion potential. Further drilling during 2018 is expected to expand the existing mineralised zone and the JORC Code compliant gold mineral resource.

The Aucu project also contains extensive copper mineralisation covering an area around 500 metres by 300 metres. Copper mineralisation occurs as chalcocite, bornite, chalcopyrite and the copper oxides malachite and azurite. Drilling has defined a significant copper deposit at surface consisting of:

- 16.5Mt at 0.36% copper containing 60,000 tonnes of copper.

The copper deposit consists of an oxide zone and a sulphide zone and the majority of drill holes contain copper mineralisation at potential economic grades. Further drilling during 2018 is expected to expand the existing mineralised zone and JORC Code compliant copper resource.

The project is located in the Kyrgyz Republic, 350km west-southwest of the capital city of Bishkek and covers 57 square kilometres. The Chanach project is located in the western part of the Tien Shan Belt, a highly mineralised zone that extending for over 2,500 km, from western Uzbekistan, through Tajikistan, Kyrgyz Republic and southern Kazakhstan to western China.

(e) **The Merolia Gold Project, Western Australia (100%)**

The Merolia Gold project consists of 771 square kilometres of the Merolia Greenstone belt near Laverton in Western Australia. The project contains multiple prospects where substantial gold mineralisation has been identified. Drilling at the Ironstone Gold and East Burtville prospects has identified multiple gold intersections including:

- 10 metres 1.8 g/t gold from 32 metres;
- 1 metres at 14.4 g/t gold from 24 metres;
- 1 metre at 6.3 g/t gold from 32 metres;
- 5 metres at 7.2 g/t gold including 1 metre at 14.2 g/t gold from surface; and
- 4 metres at 5.5 g/t gold including 1 metre at 20.8 g/t gold.

The project also contains the Comet Well gold prospect where several gold nuggets have been identified and a large 2.7 kilometre long gold in soil anomaly has been defined.

Although the Directors believe that additional capital can be obtained, assurances cannot be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce, delay or suspend its operations and this could have a material adverse effect on the Company's activities and could affect the Company's ability to continue as a going concern.

(b) **Country risk**

The Company has a project located in the Kyrgyz Republic in Central Asia, which is a less developed country than Australia with associated political, economic, legal and social risks. There can be no assurance that the systems of government and the political systems the Kyrgyz Republic will remain stable. Further, there can be no assurance that government regulations relating to foreign investment, repatriation of foreign currency, taxation and the mining industry in the Kyrgyz Republic will not be amended or replaced in the future to the detriment of the Company's business and/or projects. The Underwriter is obliged to subscribe for up to 33,333,334 New Shares and 33,333,334 New Options under the Shortfall, to the extent that New Securities are not subscribed for by Eligible Shareholders or new investors under the Rights Offer or Shortfall Offer.

The Company has also appointed CPS as lead manager to manage the Offers and to seek to place the Shortfall with new investors in the Company.

The Company has agreed to pay CPS the fees for these services as set out in Section 7.5.

A summary of the material terms of the Underwriting Agreement, including the events whereby the Underwriter may be released from its obligations under the Underwriting Agreement, are set out in section 7.5.

2.8 **Shortfall Offer**

Any New Shares and New Options not subscribed for under the Rights Offer will form the Shortfall and will be offered under the Shortfall Offer.

Subject to the terms of the Underwriting Agreement, the Directors, in consultation with the Underwriter, will have discretion as to how to allocate the Shortfall after the close of the Offers. The Directors will generally allocate New Securities under the Shortfall Offer in a manner that they consider to be fair and reasonable to Applicants under the Shortfall Offer.

The Company cannot guarantee that an Applicant will receive the number of New Shares they apply for under the Shortfall Offer. If an Applicant does not receive any or all of the New Shares which they applied for, the excess Application Monies will be returned to that Applicant without interest.

In the event that Applications for New Shares under the Shortfall Offer exceed the total amount of the Shortfall, then Applications will be scaled back.

The Company will not allocate New Shares under the Shortfall Offer to the extent that the recipient's voting power in the Company would breach of the takeover thresholds in the Corporations Act (i.e. acquiring a controlling interest in 20% or more of the issued Shares, or increasing an existing controlling interest of more than 20%, subject to certain exceptions).

2.9 **Underwriter Offer**

This Prospectus invites the Underwriter (or its nominees) to participate in an offer of 1,500,000 New Options at nil issue price and 4,000,000 New Shares (for the \$60,000 fee for acting as the Lead Manager), as part of the fees payable by the Company pursuant to the Underwriting Agreement.

All New Shares and New Options offered under the Underwriter Offer are on the same terms as the New Shares and New Options offered under the other Offers.

The primary purpose of the Underwriter Offer is for the Company to fulfil its obligation under the Underwriting Agreement to issue the New Shares and New Options to the Underwriter or its nominee.

By offering the New Shares and New Options under the Underwriter Offer, the New Shares and New Options will be issued with disclosure under Chapter 6D of the Corporations Act. Accordingly, these New Shares and New Options (and any Shares issued on their exercise) will not be subject to secondary trading restrictions.

The Underwriter Offer opens on the Opening Date and closes on the Closing Date, as with the other Offers.

The Directors reserve the right to extend the Offer Period of the Underwriter Offer, or close the Underwriter Offer prior to the Closing Date, subject to the requirements of the Corporations Act and the Listing Rules. The timing of the Underwriter Offer is set out in the Timetable.

The Company has also entered into an agreement with Aftron Pty Ltd (ACN 000 240 997) (**Aftron**) pursuant to which Aftron granted the Company a loan of \$600,000 secured over the assets of the Company (**Secured Loan**). On 16 October 2018, a letter agreement was signed where it was agreed that the Secured Loan would be repaid in the following manner:

- (a) Aftron will apply for \$200,000 of the Shortfall at the same price (1.5 cents) and terms (free attaching Option) as under the Offers (being 13,333,334 New Shares and 13,333,334 New Options) and the payment for the New Shares will be set off against the Secured Loan;
- (b) \$300,000 in cash from the proceeds of the Offer (see Section 1.3); and
- (c) \$100,000 in cash from the Company's existing funds.

3. Applications for New Shares

3.1 Accepting the Rights Offer – Eligible Shareholders only

(a) Options available

The number of New Securities to which an Eligible Shareholder is entitled is shown on the personalised Entitlement and Acceptance Form sent to each Eligible Shareholder accompanying this Prospectus. An Eligible Shareholder may:

- take up their Rights in full;
- take up their Rights in full and apply for additional securities;
- take up part of their Rights and sell the balance on ASX;
- sell all their Rights on ASX;
- sell part of their Rights on ASX and allow the balance to lapse;
- do nothing, in which case all of their Rights will lapse.

Further information is provided below.

(b) Accepting Rights in full or in part

An Eligible Shareholder who wishes to accept their Rights in full or in part, either:

- complete the Entitlement and Acceptance Form for the number of New Securities they wish to apply for in accordance with the instructions on the form, and return their completed form together with a cheque, bank draft, or money order payable to “White Cliff Minerals Limited” for the Application Monies to the Share Registry – see Section 3.2; or
- make a payment through the BPay® facility for the number of New Securities they wish to apply for in accordance with the instructions on the Entitlement and Acceptance Form – see Section 3.4.

Entitlement and Acceptance Forms must be received by **5:00pm on the Closing Date**.

If an Eligible Shareholder does not accept and/or sell all of their Rights, then the balance of those Rights will lapse and the New Securities that are not subscribed for will form part of the Shortfall.

If an Eligible Shareholder does not take up all of their Rights, then their percentage shareholding in the Company will reduce.

(c) Take up their Rights in full and apply for additional securities

An Eligible Shareholder may apply for their full entitlement as above and additional securities from the shortfall – refer to section 2.8.

(d) Accepting Rights in full and applying for additional New Securities under the Shortfall Offer

An Eligible Shareholder who wishes to accept their Rights in full and apply for New Securities under the Shortfall Offer, either:

- complete the Entitlement and Acceptance Form for all of their Rights and specify the number of additional New Securities they wish to apply for in accordance with the instructions on the form, then return their completed form together with a cheque, bank draft, or money order for the Application Monies to the Share Registry; or
- make a payment through the BPay® facility for all of their Rights and the number of additional New Securities they wish to apply for in accordance with the instructions on the Entitlement and Acceptance Form.

Entitlement and Acceptance Forms must be received by no later than **5:00pm on the Closing Date**.

The allocation and issue of New Securities under the Shortfall Offer will be determined by the Directors in their discretion. The allocation policy in relation to the Shortfall Offer is set out in Section 2.8.

(e) **Allowing Rights to lapse**

An Eligible Shareholder who does not wish accept any of their Rights is not required to take any action. If they do nothing, then their Rights will lapse. The New Shares not subscribed for will form part of the Shortfall.

If an Eligible Shareholder does not take up all of their Rights, then their percentage shareholding in the Company will likely decrease.

3.2 **Lodging Application Forms – payment by cheque, bank draft or money order**

Other than Eligible Shareholders making payment by BPay®, completed Application Forms (i.e. Entitlement and Acceptance Forms or Shortfall Application Forms) together with accompanying cheques, bank drafts or money orders for the Application Monies must be mailed or delivered to:

By hand delivery:

White Cliff Minerals Ltd
Suite 2, Level 1, 47 Havelock Street
PERTH WA 6000

By Post:

Computershare Investor Services Pty Ltd
GPO Box 505
MELBOURNE VIC 3001

Cheques and bank drafts must be drawn on an Australian bank or money order made payable in Australian dollars to “**White Cliff Minerals Limited**” and crossed “Not Negotiable”.

The Application Forms do not need to be signed to be binding. If an Application Form is not completed correctly it may still be treated as valid. The Directors’ decision as to whether to treat the form as valid and how to construe, amend or complete the Application Form is final.

Applicants to the Shortfall Offer who are not Eligible Shareholders must submit their Application Form any payment in accordance with this Section 3.2 and cannot make payment by BPay®.

Applicants to the Underwriter Offer do not need to submit any payment with their Application Forms as the New Options under that offer are not issued for cash consideration.

3.3 **Applications for Shortfall through the Underwriter**

Persons who have received a firm allocation or other offer of New Securities under the Shortfall Offer or the Underwriter Offer from the Underwriter (either directly or via their stockbroker) may apply for New Securities by arrangement with the Underwriter.

Each such Applicant must submit a completed Shortfall Application Form together with the relevant Application Monies (if applicable) before **5.00pm (WST) on the Closing Date**, in accordance with the Underwriter’s directions.

By making an Application to the Underwriter, an Applicant will be taken to have confirmed that they have received a copy of the Prospectus together with the Shortfall Application Form.

3.4 Applications by Eligible Shareholders – payment by BPay®

For Eligible Shareholders wishing to make payment by BPay®, payment should be made according to the instructions set out on the Entitlement and Acceptance Form using the BPay® Biller Code and Customer Reference Number shown on the form. Payments via BPay® can only be made by a holder of an account with an Australian financial institution that supports BPay® transactions.

The reference number shown on each Entitlement and Acceptance Form (**Reference Number**) is used to identify an Eligible Shareholder's holding. For Eligible Shareholders who have multiple holdings, they will have multiple Reference Numbers. They must use the Reference Number to pay for each holding separately. Failure to do so may result in an underpayment. If payment is made by BPay® for less than an Eligible Shareholder's full Rights, the remaining Rights will form part of the Shortfall.

Eligible Shareholders paying by BPay®:

- do not need to return the Entitlement and Acceptance Form but are taken to have made the declarations on that form; and
- who do not pay for their Rights in full are deemed to have taken up their Rights in respect of such whole number of New Securities which is covered by the Application Monies.

Financial institutions may implement cut-off times with regards to electronic payment and Eligible Shareholders should therefore take this into consideration when making payment. The Company is not responsible for any postal or delivery delays or delay in the receipt of BPay® payment.

3.5 Applications for Shortfall

Persons who have received a firm allocation or other offer of New Securities under the Shortfall Offer from the Company (either directly or via their stockbroker) may apply for New Securities by arrangement with the Company.

Each such Applicant must submit a completed Shortfall Application Form together with the relevant Application Monies (if applicable) before **5.00pm (WST) on the Closing Date**.

By making a Shortfall Application to the Company, an Applicant will be taken to have confirmed that they have received a copy of the Prospectus together with the Shortfall Application Form.

3.6 Selling or dealing with Rights

The Rights Offer is renounceable. Eligible Shareholders may sell their Rights on ASX or transfer them to another person as outlined below.

(a) Selling Rights on ASX

Rights trading on the ASX commences on Friday, 19 October 2018 and is expected to cease on Thursday, 1 November 2018.

An Eligible Shareholder who wishes to sell all of their Rights on ASX should contact a stockbroker. An Entitlement and Acceptance Form should **not** be returned to the Share Registry.

An Eligible Shareholder who wishes to take up part of their Rights and sell part of the balance of their Rights on ASX must complete the Entitlement and Acceptance Form for the number of New Securities they wish to apply for and lodge the completed Entitlement and Acceptance Form together with a cheque for the Application Monies, or make a BPay® payment (in respect of that part of their Rights which they intend to

take up) with the Share Registry. Further, they should contact a stockbroker to sell the balance of the Rights on ASX.

The Company does not accept any responsibility for any failure by a stockbroker to carry out an Eligible Shareholder's instructions. There is no guarantee that an Eligible Shareholder will be able to sell all or part of their Rights on ASX or that any particular price at which the Rights can be sold will be available.

(b) Dealing with Rights other than on ASX

An Eligible Shareholder may elect to transfer all or part of their Rights to another person other than on ASX provided that the purchaser is not an Excluded Shareholder or would not be an Excluded Shareholder if the purchaser was the registered holder of the Shares.

To transfer some or all of an Eligible Shareholder's Rights to another person other than on the ASX, that Eligible Shareholder must complete a standard renunciation and acceptance form (which can be obtained from the Share Registry). This form must be completed by the Eligible Shareholder (as seller) and by the purchaser in accordance with the instructions on the form. The completed form must be lodged with the Share Registry (see Section 3.2) by 5.00pm (WST) on the Closing Date together with the completed Entitlement and Acceptance Form and a cheque for the Application Monies (from the purchaser).

3.7 Issue and quotation of New Shares on ASX

New Securities under the Rights Offer are expected to be issued and holding statements despatched as soon as practicable after the Closing Date, in accordance with the ASX Listing Rules and the Timetable. New Securities to be issued under the Shortfall Offer will be issued on a progressive basis. No issue of New Securities will be made until ASX grants permission for quotation of the New Shares.

Application for official quotation on ASX of the New Shares issued pursuant to this Prospectus will be made within 7 days after the Prospectus Date. The fact that ASX may agree to grant official quotation of the New Shares is not to be taken in any way as an indication of the merits of the Company or the New Shares.

If permission for quotation of New Shares is not granted by ASX within 3 months after the Prospectus Date, the New Shares will not be allotted and Application Monies will be refunded (without interest) as soon as practicable.

The Company will apply for quotation of the New Options. The New Options will therefore form a quoted class of Securities.

It is an Applicant's responsibility to determine their holdings before trading in New Securities. Any person who sells New Securities before receiving confirmation of their holding will do so at their own risk.

The Directors reserve the right not to proceed with the whole or any part of the Offers (or either of them) at any time before the allotment of New Securities. In that event, relevant Application Monies will be refunded without interest.

3.8 No brokerage

Investors will not pay brokerage as a subscriber for New Securities under an Offer.

3.9 Holding of Application Monies

Application Monies will be held in a trust account until the New Securities are issued.

The trust account established by the Company for this purpose will be solely used for handling Application Monies. Any interest earned on Application Monies will be for the benefit of, and will remain the sole property of, the Company and will be retained by the Company whether or not the issue of New Securities takes place.

Applications and Application Monies may not be withdrawn once they have been received by the Company.

3.10 **Excluded Shareholders**

The Rights Offer is not made to Shareholders on the Record Date who have a registered address outside Australia or New Zealand (**Excluded Shareholders**). Neither the Prospectus nor the Entitlement and Acceptance Form constitutes an offer or invitation in any place in which, or to any person to whom, it would not be lawful to make such an offer or invitation.

In making the decision to not extend the Rights Offer to Excluded Shareholders the Company has taken into account:

- the small number Shareholders outside Australia and New Zealand;
- the number and value of New Shares that would be offered to Shareholders outside Australia and New Zealand; and
- the cost of complying with the legal requirements and requirements of regulatory authorities in the overseas jurisdictions.

The Rights Offer in this Prospectus to Eligible Shareholders with an address in New Zealand is made in reliance on the *Shares Act (Overseas Companies) Exemption Notice 2013* (New Zealand). The New Securities are not being offered or sold to the public within New Zealand other than to existing Shareholders of the Company with registered addresses in New Zealand.

This Prospectus has not been registered, filed with or approved by any New Zealand regulatory authority. It is not an investment statement or prospectus under New Zealand law and is not required to, and may not, contain all the information that an investment statement or prospectus under New Zealand law is required to contain.

The Company is not required to determine whether or not any registered Eligible Shareholder is holding Shares on behalf of persons who are resident outside Australia or New Zealand (including nominees, custodians and trustees) or the identity or residence of any beneficial owners of Shares. Any Eligible Shareholders holding Shares on behalf of persons who are resident outside Australia and New Zealand are responsible for ensuring that any dealing with New Securities issued under the Rights Offer do not breach the laws and regulations in the relevant overseas jurisdiction, and should seek independent professional advice and observe any applicable restrictions relating to the taking up of Rights or the distribution of this Prospectus or the Entitlement and Acceptance Form.

The distribution of this Prospectus and the Entitlement and Acceptance Form (including electronic copies) outside Australia or New Zealand may be restricted by law and therefore persons who come into possession of this Prospectus should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable Shares laws.

3.11 **Nominee for Excluded Shareholders' Rights**

For the purposes of Listing Rule 7.7, the Company has appointed the Lead Manager as nominee to arrange for the sale of the Rights which would have been offered to the Excluded Shareholders had they been entitled to participate in the Rights Offer and to account to the Excluded Shareholders for their proportion of the sale proceeds net of expenses.

The Lead Manager has the absolute and sole discretion to determine the timing and the price at which the Rights may be sold and the manner of any such sale. Neither the Company nor the Lead Manager will be subject to any liability for failure to sell the Rights or to sell them at a particular price.

If, in the reasonable opinion of the Lead Manager, there is not a viable market for the Rights or a surplus over the expenses of sale cannot be obtained for the Rights that would have been offered to the Excluded Shareholders, then the Rights will be allowed to lapse and they will form part of the Shortfall Offer.

3.12 **Applicants from outside of Australia**

This Prospectus does not constitute an offer of New Securities in any jurisdiction where, or to any person to whom, it would not be lawful to issue the Prospectus or make the Offers.

It is the responsibility of any Applicant who is resident outside of Australia (or in the case of the Rights Offer, Australia and New Zealand) to ensure compliance with all laws of any country relevant to their Application, and any such Applicant should consult their professional adviser as to whether any government or other consents are required, or whether any formalities need to be observed to enable them to apply for and be issued New Securities. Return of a duly completed Application Form will constitute a representation and warranty by an Applicant that there has not been any breach of such regulations.

The Company has not taken any action to register or qualify the New Securities or the Offers, or otherwise to permit a public offering of the New Securities, in any jurisdiction outside Australia.

3.13 **CHES**

The Company participates in the Clearing House Electronic Sub-register System (CHES). ASX Settlement, a wholly owned subsidiary of ASX, operates CHES in accordance with the Listing Rules and the ASX Settlement Rules.

Under CHES, Applicants will not receive a certificate but will receive a statement of their holding of New Shares (CHES Statement or Holding Statement).

If an Applicant is broker sponsored, ASX Settlement will send them a CHES Statement.

The CHES Statement will set out the number of New Securities issued under this Prospectus, provide details of a holder identification number and give the participation identification number of the sponsor.

If an Applicant is registered on the issuer sponsored sub-register, their statement will be dispatched by the Share Registry and will contain the number of New Securities issued to that Applicant under this Prospectus and their security holder reference number.

A CHES Statement or issuer sponsored statement will routinely be sent to Security Holders at the end of any calendar month during which the balance of their Security holding changes. Security Holders may request a statement at any other time, however, a charge may be made for additional statements.

3.14 **Privacy**

Applicants will be providing personal information to the Company and the Share Registry. The Company and the Share Registry collect, hold and use Applicant's personal information in order to assess their Application, service their needs as an investor, provide facilities and services that they request, carry out appropriate administration and to facilitate distribution payments and corporate communications to the Applicant as a Security Holder.

The information may also be used from time to time and disclosed to persons inspecting the register, bidders for an Applicant's Shares in the context of takeovers, regulatory bodies including the Australian Taxation Office, authorised Shares brokers, print service providers, mail houses and the Share Registry.

Collection, maintenance and disclosure of certain personal information are governed by legislation including the Privacy Act (as amended), the Corporations Act and certain rules of ASX. Applicants who do not provide the information required on an Application Form, the Company may not be able to accept or process their Application.

Under the Privacy Act, Applicants may request access to their personal information held by, or on behalf of, the Company or the Share Registry. This request should be in writing to the Company through the Share Registry.

3.15 Taxation implications

The Directors do not consider that it is appropriate to give potential Applicants advice regarding the taxation consequences of applying for New Securities under this Prospectus as it is not possible to provide a comprehensive summary of the possible taxation positions of potential Applicants. The Company, its advisers and officers do not accept any responsibility or liability for any taxation consequences to potential Applicants in relation to the Offers. Potential Applicants should, therefore, consult their own tax adviser in connection with the taxation implications of the Offers.

4. Effect of the Offers

4.1 Principal effect of the Offers on the Company

The principal effects of the Offers, assuming all Rights are accepted, will be to:

- increase the total number of Shares on issue from 76,991,814 Shares as at the Prospectus Date to **230,975,442** Shares (plus 4,000,000 New Shares to the Underwriter);
- increase the number of Options on issue from 23,897,157 as at the Prospectus Date to **177,880,785** Options (plus 1,500,000 New Options to the Underwriter); and
- increase cash reserves by \$2,309,754 (before the costs of the Offers are paid), assuming maximum subscription.

4.2 Effect on capital structure

The capital structure of the Company following completion of the Offers is set out below:

Capital Structure	Underwritten Amount	Maximum subscription
Shares		
Shares currently on issue	76,991,814	76,991,814
Shares to be issued under the Rights Offer and Shortfall Offer	33,333,334	153,983,628
Lead Manager Fee	4,000,000	4,000,000
Total number of Shares on issue on completion of the Offer	114,325,148	234,975,442
Options		
Options on issue	23,897,157	23,897,157

Underwriting Fee	1,500,000	1,500,000
Total number of Options on issue on completion of the Offer	58,730,491	179,380,785

Notes:

1. There is no minimum subscription condition for any Offer to proceed; however the Rights Offer and the Shortfall Offer is partly underwritten. Therefore the minimum amount that will be raised under the Offers is \$500,000 (before costs), which is equal to the Underwritten Amount (assuming that the Underwriting Agreement is not terminated).
2. The figures in the table above assume that other Shares are not issued (including on the exercise of Options) prior to the close of the Offers.

4.3 Pro forma statement of financial position

Set out below is the audited consolidated statement of financial position of the Company as at 30 June 2018.

The consolidated statement of financial position below is to be read in conjunction with the notes to the financial statements as published in the Company's Annual Report 2018 available on the Company's website (<http://wcm minerals.com.au/annual-reports/>). This annual report can also be obtained from the ASX announcements platform (<https://www.asx.com.au/asx/statistics/announcements.do>) using the Company's ASX code 'WCN'.

The pro forma does not include the 4,000,000 New Shares and 1,500,000 New Options to be issued to the Underwriter.

4.4 Effect on control of the Company

The potential effect that the Offers could have on the control of the Company, and the consequences of that effect, will depend upon a number of factors, including investor demand and existing Shareholdings.

As at the Prospectus Date, the Company has 76,991,814 Shares and 23,897,157 Options on issue.

If none of the Rights Offer or Shortfall Offer is subscribed for by existing Shareholders, then if the maximum number of shares that could be issued to the Underwriter of 37,333,334 shares would represent approximately 32.66% of the Company's issued Share capital as at the Prospectus Date.

The Underwriter has advised the Company that it proposes to seek firm commitments from investors to subscribe for a portion of the underwriting commitment in its place. However, at the Prospectus Date, no such firm commitments are yet in place.

The Underwriter has agreed in the Underwriting Agreement that neither it nor any investor who subscribes for a portion of the underwriting commitment in its place will obtain voting power of 19.99% or more in relation to the Shares on issue following closing of the Offers, except to the extent permitted by law.

The potential interests of the Underwriter (assuming the Underwriter subscribes in its own right), and each substantial Shareholder, assuming different scenarios under the Offers, are shown in the table below.

Name	Percentage of total Shares before Offers	Percentage of total Shares after Offers		
		100% take up	50% take up	0% take up
CPS Capital Group	0%	1.70%	19.51%	32.66%

Note:

1. This table assumes that no Options are exercised and no Performance Rights converted prior to the issue of New Securities under the Offers.
2. The level of take up in this table assumes that all Eligible Shareholders accept their Rights at the different levels shown (e.g. a "50% take up" assumes all Eligible Shareholders accept 50% of their Rights, and the Underwriter completes the issue to the Underwritten amount; and a "0% take up" assumes that all Eligible Shareholders do not accept their Rights and the Underwriter subscribes for the full Underwritten amount).

3. The Underwriter will also receive 1,500,000 New Options and 4,000,000 New Shares and these are included in the percentage calculations above.

If all of the Eligible Shareholders under the Rights Offer accept their Rights in full, then the Rights Offer will not have any effect on the control of the Company. In this case, Eligible Shareholders will maintain their percentage shareholding interest in the Company.

4.5 **Details of substantial shareholders**

A “substantial holding” under the Corporations Act means a ‘relevant interest’ (i.e. controlling interest) in 5% or more of the votes attaching to voting shares.

There are no existing Shareholders with a known substantial holding at the Prospectus Date.

5. Risk Factors

5.1 Introduction

The New Securities offered by this Prospectus should be viewed as speculative and investors should be aware of, and take into account, the risk factors involved.

This Section 5 is not intended to be an exhaustive list of the considerations to be taken into account by investors in deciding whether to apply for New Securities, nor all of the risk factors to which the Company is exposed. Some of these risks can be mitigated by the use of safeguards and appropriate systems and actions, but many are outside the control of the Company and cannot be mitigated.

There are risks associated with investing in any form of business and with investing in the share market generally. All investors should consult their professional advisers if they are in any doubt as to any aspect of this Prospectus, the Offers or any matter relating to an investment in the Company.

5.2 Company specific risks

Please refer to Section 1.4 for risks that have been identified as being key risks specific to an investment in the Company.

5.3 Mining industry risks relating to the Company

Mineral exploration and mining may be hampered by circumstances beyond the control of the Company and are speculative operations which, by their nature, are subject to a number of inherent risks, including the following:

(a) Exploration risks

Mining exploration and development is a high risk undertaking. The success of the Company depends on the delineation of economically minable reserves and resources, access to required development capital, movement in the price of commodities, securing and maintaining title to the Company's exploration and mining tenements and obtaining all consents and approvals necessary for the conduct of its exploration activities.

Exploration on the Company's existing tenements may be unsuccessful, resulting in a reduction of the value of those tenements, diminution in the cash reserves of the Company and possible relinquishment of exploration tenements.

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that cost estimates and underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

(b) Resource estimates

Resource estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend, to some extent, on interpretations, which may prove to be inaccurate and require adjustment. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

(c) **Ability to exploit successful discoveries**

It may not always be possible for the Company to exploit successful discoveries which may be made in areas in which the Company has an interest. Such exploitation would involve obtaining the necessary licences or clearances from relevant authorities or land beneficiaries that may require conditions to be satisfied and/or the exercise of discretions by such authorities. It may or may not be possible for such conditions to be satisfied. Further, the decision to proceed to further exploitation may require participation of other companies whose interests and objectives may not be the same as the Company's.

(d) **Mining and development risks**

Profitability depends on successful exploration and/or acquisition of reserves, design and construction of efficient processing facilities, competent operation and management and proficient financial management.

Mining and development operations can be hampered by force majeure circumstances, environmental considerations and cost overruns for unforeseen events.

(e) **Lease and licence risks**

Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to, or its interest in, tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments. Further, the Company cannot guarantee that renewals of valid tenements will be granted on a timely basis, or at all.

(f) **Title risks**

Interests in tenements are governed by legislation in their respective jurisdictions and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments.

(g) **Environment and government approvals**

The operations and activities of the Company are subject to environmental laws and regulations. As with most exploration projects and mining operations, the Company's operations and activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. The Company attempts to conduct its operations and activities to the highest standard of environmental obligation, including compliance with all environmental laws.

(h) **Native Title Risks**

The Company has tenement interests in Australia. Accordingly, both the *Native Title Act 1993* (Cth) (**Native Title Act**) and related State native title legislation and Aboriginal land rights and Aboriginal heritage legislation may affect the Company's ability to gain access to prospective exploration areas or obtain production titles.

Compensatory obligations may be necessary in settling native title claims if lodged over any tenements acquired by the Company. The existence of outstanding registered native title claims means that the grant of a tenement in respect of a particular tenement application may be significantly delayed or thwarted pending resolution of future act procedures in the Native Title Act. The level of impact of these matters will depend, in part, on the location and status of the tenements acquired by the Company. At this stage it is not possible to quantify the impact (if any) which these developments may have on the operations of the Company.

(i) **Realising value from projects**

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes, and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

The Directors have between them significant mineral exploration and operational experience. However, no assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenement interests. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

(j) **Joint venture parties, agents and contractors**

There is a risk of financial failure or default by a participant in any joint venture to which the Company is or may become a party or the insolvency or managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity.

(k) **Access risks**

Where mining tenements (or part thereof) are subject to private land, resource companies are required to negotiate access, compensation and mining agreements with the beneficial party in order to gain access to explore, develop and mine the resource. Negotiation and execution of such agreements are subject to the willingness of beneficial parties to co-operate with resource entities. Land use may also affect the timing of access to such land. As such, the Company maintains a high standard of co-operative working with beneficial title holders.

(l) **Mineral assemblage and consistency**

The value of, and ability to mine, a resource is partially dependent on the mineral assemblage and / or quality and surrounding geological and soil setting. Information is not always necessarily available at the commencement of exploration, and is established at varying stages throughout development. Such data can affect the Company's ability to successfully extract, treat or sell the product. The Company makes all efforts to determine this information at practical stages throughout exploration to reduce risks associated with mineral assemblage and quality.

(m) **Competition**

The Company competes with other companies, including major mining companies in Australia and internationally. Some of these companies have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. There can be no assurance that the Company can compete effectively with these companies.

(n) **Insurance risk**

In certain circumstances the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

Insurance of all risks associated with mineral exploration and production is not always available and where available the costs can be prohibitive.

(o) **Key personnel**

Recruiting and retaining qualified personnel are important to the Company's success. The number of persons skilled in the exploration and development of mining properties is limited and competition for such persons is strong. There can be no assurance that there will be no detrimental impact on the Company if such persons employed cease their employment with the Company.

5.4 **General investment risks**

The following risks have been identified as being some general risks associated with an investment in the Company, noting its publicly listed status:

(a) **Equity market conditions**

Shares quoted on the Shares market, and in particular Shares of mining and exploration companies, can experienced extreme price and volume fluctuations that are often unrelated to the operating performances of such companies. The market price of Shares may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. These security market conditions may affect the value of the Company's quoted Shares regardless of the Company's operating performance.

General factors that may affect the market price of Shares include economic conditions in both Australia and internationally, investor sentiment, local and international share market conditions, changes in interest rates and the rate of inflation, variations in commodity prices, the global security situation and the possibility of terrorist disturbances, changes to government regulation, policy or legislation, changes which may occur to the taxation of companies as a result of changes in Australian and foreign taxation laws, changes to the system of dividend imputation in Australia, and changes in exchange rates.

(b) **Liquidity risk**

There can be no guarantee that there will be an active market for the New Shares or that the trading price of the New Shares will increase. Noting the current state of equity capital markets, there has been and may continue to be relatively few buyers or sellers of New Shares on ASX at any given time. This may affect the volatility of the market price of the New Shares. It may also affect the prevailing market price at which Security Holders are able to sell their New Shares.

(c) **Shares investment risk**

Investors should be aware that there are risks associated with any Shares investment. Shares quoted on the stock market, and in particular Shares of mining and exploration companies have experienced extreme price and volume fluctuations that have often been unrelated to the operating performances of such companies. These factors may materially affect the market price of the Shares regardless of the Company's performance.

(d) **Potential acquisitions**

As part of its business strategy, the Company may make acquisitions of or significant investments in companies, products, technologies or resource projects. Any such future transactions would be accompanied by the risks commonly encountered in making acquisitions of companies, products, technologies or resource projects.

(e) **Other risks**

Other risk factors include those normally found in conducting business, including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel, non-insurable risks, delay

in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the business or trade of the Company.

(f) **Price and exchange rate fluctuations**

The revenue derived through the sale of gold, copper or nickel exposes the potential income of the Company to price and exchange rate risks. Prices of gold, copper and nickel fluctuate and are affected by numerous factors beyond the control of the Company. These factors include world demand for such commodities, forward selling by producers and the level of production costs. Moreover, prices are also affected by macroeconomic factors such as expectations regarding inflation, interest rates and global and regional demand for, and supply of, these commodities.
